"By using the results of a joint research project carried out by the FOVOG (Research Centre for the Comparative History of Religious Orders) in Dresden and the Department of Medieval Studies at CEU (Budapest) during the last some years, the lecture offers an overview of the new research directions in monastic studies. It will discuss the key concepts, such as the transmission of ideas, objects and complex knowledge packages in monastic circles and research results will be presented on the issue of monastic architecture, technological innovations and of „monastic business management”."
